

Introducing GTS™

The GTS by M&S is the most accurate and innovative glare testing system available on the market today. Our proprietary design allows for an equal distribution of light at any vision testing distance thereby replicating real life experiences.

✓ Test using ETDRS at scalable contrast levels

✓ Test using Linear Sine Gratings while changing cycles per degree and/or contrast levels

✓ Test using Holladay Contrast System for clinical trials

Co-engineered by Dr. Jack Holladay, the GTS system easily adapts to any Smart System® sold and gives you consistent, repeatable results to effectively evaluate a patient's vision.

Benefits of the GTS

- Consistent lumination, no need to recharge batteries and always ready for use.
- Test at low, medium or high luminance levels.
- Test using any symbol or letter set and at any contrast level.
- Use in direct view or a mirror application
- Less expensive than the current BAT test.
- Easy to install and utilizes long-life, high intensity LED's
- Virtually maintenance free
- Available on M&S supplied monitors and all-in-one computers
